Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=105> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Bioethics elicit as much controversy as the prospect of permitting the commercial sale of CRISPR germline editing. At the core of the supportive position lies the promise of eradicating severe hereditary genetic diseases and reducing long-term public health costs. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of creating a permanent genetic class divide where wealthy parents purchase cognitive and physical enhancements. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is creating strict regulatory frameworks that restrict modifications purely to therapeutic cures. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of permitting the commercial sale of CRISPR germline editing?

- A: it is a moral imperative to use biotechnology to spare future children from known genetic illnesses
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It has been universally endorsed by all legal and ethical scholars in Bioethics.
- D: It would completely eliminate the need for any government oversight in Bioethics.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding permitting the commercial sale of CRISPR germline editing to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: it is possible to maintain a clear and enforceable distinction between medical therapy and cosmetic enhancement
- D: That public opinion is always unified on matters of Bioethics.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of permitting the commercial sale of CRISPR germline editing?

- A: CRISPR-Cas9 is a highly theoretical tool that has never been tested in a laboratory.
- B: Hereditary diseases play a vital role in maintaining the ecological balance of human populations.
- C: Unregulated genetic modification risks translating economic inequality into biological determinism.
- D: Most genetic diseases are controlled by a single, easily isolated gene.

Reading Passage:

The ongoing debate surrounding imposing strict state regulations on decentralized cryptocurrencies has emerged as a central theme in modern Economics and Law. Proponents argue that its adoption represents a significant milestone, promising protecting consumers from market volatility and preventing money laundering and illicit financing. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding stifling technological innovation and undermining the individual sovereignty of decentralized networks. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: It would completely eliminate the need for any government oversight in Economics and Law.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It has been universally endorsed by all legal and ethical scholars in Economics and Law.
- D: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That public opinion is always unified on matters of Economics and Law.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks
- D: That the financial cost of implementing the technology is completely negligible.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A: All transactions on public blockchains are completely invisible and untraceable.
- B: Most cryptocurrency users are using digital assets to buy physical real estate.
- C: Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
- D: Paper fiat currency is completely immune to inflation and currency manipulation.

Reading Passage:

Few issues in contemporary Bioethics elicit as much controversy as the prospect of permitting the commercial sale of CRISPR germline editing. At the core of the supportive position lies the promise of eradicating severe hereditary genetic diseases and reducing long-term public health costs. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of creating a permanent genetic class divide where wealthy parents purchase cognitive and physical enhancements.
