Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=11> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Technology and Law elicit as much controversy as the prospect of AI-driven judicial sentencing algorithms. At the core of the supportive position lies the promise of the elimination of human bias and greater consistency in judicial sentencing. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding perpetuating historical prejudices embedded in the training data and violating procedural transparency. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is implementing audit protocols that force algorithms to explain their decision-making logic. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of AI-driven judicial sentencing algorithms?

- A: It has been universally endorsed by all legal and ethical scholars in Technology and Law.
- B: automated decision systems can process massive volumes of case law faster and more consistently than human judges
- C: It will guarantee immediate financial profits for all stakeholders involved.
- D: It would completely eliminate the need for any government oversight in Technology and Law.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding AI-driven judicial sentencing algorithms to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That the financial cost of implementing the technology is completely negligible.
- C: historical sentencing databases contain patterns that are appropriate to replicate in future rulings
- D: That public opinion is always unified on matters of Technology and Law.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of AI-driven judicial sentencing algorithms?

- A: Historical sentencing data contains no patterns of racial or economic disparity.
- B: Judges will be completely replaced by robots within the next five years.
- C: Algorithms risk encoding past discriminatory practices under the guise of statistical objectivity.
- D: AI systems are physically incapable of processing complex legal briefs.

Reading Passage:

The ongoing debate surrounding compulsory voting in national elections has emerged as a central theme in modern Political Philosophy. Proponents argue that its adoption represents a significant milestone, promising enhanced democratic legitimacy and broader representation of marginalized groups. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding infringing upon individual liberty and forcing politically disengaged citizens to make arbitrary choices. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is mandating turnout at the polls while including a prominent 'None of the Above' option on the ballot. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of compulsory voting in national elections?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: voting is a civic obligation comparable to tax paying or jury service, which benefits the collective
- C: It has been universally endorsed by all legal and ethical scholars in Political Philosophy.
- D: It would completely eliminate the need for any government oversight in Political Philosophy.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding compulsory voting in national elections to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That public opinion is always unified on matters of Political Philosophy.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: higher voter turnout directly correlates with a more responsive and accountable government

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of compulsory voting in national elections?

- A: Uninformed voters are statistically more likely to vote for conservative policies.
- B: Compulsory voting always results in the election of radical political candidates.
- C: Forced participation may compromise the qualitative value of the democratic mandate.
- D: Most democratic countries have already banned voluntary voting systems.

Reading Passage:

The ongoing debate surrounding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers has emerged as a central theme in modern Social Policy. Proponents argue that its adoption represents a significant milestone, promising ensuring all citizens have equal access to essential goods regardless of their market purchasing power. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding creating inefficient state monopolies and restricting individual consumer choice and flexibility. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is contracting service provision to private entities under strict, publicly managed quality caps. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: It would completely eliminate the need for any government oversight in Social Policy.
- B: direct services protect vulnerable individuals from market exploitation and ensure money is spent on essential needs
- C: It will guarantee immediate financial profits for all stakeholders involved.
- D: It has been universally endorsed by all legal and ethical scholars in Social Policy.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers to stand?

- A: the state can manage and deliver complex services more cost-effectively than private market competition
- B: That public opinion is always unified on matters of Social Policy.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: That the financial cost of implementing the technology is completely negligible.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A:** Cash transfers are administratively more expensive than building public hospitals.
- B:** The dispute highlights a tension between state-managed welfare equity and individual consumer autonomy.
- C:** Free public transport has never been attempted in any European city.
- D:** High-income earners are legally excluded from using public healthcare systems.
