Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=123> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Political Philosophy elicit as much controversy as the prospect of compulsory voting in national elections. At the core of the supportive position lies the promise of enhanced democratic legitimacy and broader representation of marginalized groups. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of infringing upon individual liberty and forcing politically disengaged citizens to make arbitrary choices. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably mandating turnout at the polls while including a prominent 'None of the Above' option on the ballot. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of compulsory voting in national elections?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It would completely eliminate the need for any government oversight in Political Philosophy.
- C: voting is a civic obligation comparable to tax paying or jury service, which benefits the collective
- D: It has been universally endorsed by all legal and ethical scholars in Political Philosophy.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding compulsory voting in national elections to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: higher voter turnout directly correlates with a more responsive and accountable government
- D: That public opinion is always unified on matters of Political Philosophy.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of compulsory voting in national elections?

- A: Compulsory voting always results in the election of radical political candidates.
- B: Uninformed voters are statistically more likely to vote for conservative policies.
- C: Most democratic countries have already banned voluntary voting systems.
- D: Forced participation may compromise the qualitative value of the democratic mandate.

Reading Passage:

Few issues in contemporary Culture and Urbanism elicit as much controversy as the prospect of giving historic preservation laws veto power over urban housing developments. At the core of the supportive position lies the promise of preserving cultural heritage and maintaining the unique aesthetic identity of historic cities. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding restricting the supply of modern, affordable housing and driving up real estate costs for residents. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is permitting the conversion of historic facades while allowing modern construction behind them. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of giving historic preservation laws veto power over urban housing developments?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: once a historic building is demolished, a piece of communal memory and architectural history is lost forever
- C: It would completely eliminate the need for any government oversight in Culture and Urbanism.
- D: It has been universally endorsed by all legal and ethical scholars in Culture and Urbanism.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding giving historic preservation laws veto power over urban housing developments to stand?

- A: That public opinion is always unified on matters of Culture and Urbanism.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: affordable housing demands cannot be met by building on non-historic outer city sites (greenfield land)

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of giving historic preservation laws veto power over urban housing developments?

- A: Preservation policies reflect a prioritisation of collective memory over immediate economic utility.
- B: Building housing always results in a net decrease in local economic activity.
- C: Historic buildings are structurally safer than modern steel skyscrapers.
- D: No private developer has ever agreed to restore a listed landmark.

Reading Passage:

The ongoing debate surrounding permitting the commercial sale of CRISPR germline editing has emerged as a central theme in modern Bioethics. Proponents argue that its adoption represents a significant milestone, promising eradicating severe hereditary genetic diseases and reducing long-term public health costs. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of creating a permanent genetic class divide where wealthy parents purchase cognitive and physical enhancements. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is creating strict regulatory frameworks that restrict modifications purely to therapeutic cures. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of permitting the commercial sale of CRISPR germline editing?

- A: it is a moral imperative to use biotechnology to spare future children from known genetic illnesses
- B: It would completely eliminate the need for any government oversight in Bioethics.
- C: It has been universally endorsed by all legal and ethical scholars in Bioethics.
- D: It will guarantee immediate financial profits for all stakeholders involved.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding permitting the commercial sale of CRISPR germline editing to stand?

- A: it is possible to maintain a clear and enforceable distinction between medical therapy and cosmetic enhancement
- B: That the financial cost of implementing the technology is completely negligible.
- C: That public opinion is always unified on matters of Bioethics.
- D: That traditional methods have never successfully solved any of the problems in this area.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of permitting the commercial sale of CRISPR germline editing?

- A:** CRISPR-Cas9 is a highly theoretical tool that has never been tested in a laboratory.
- B:** Unregulated genetic modification risks translating economic inequality into biological determinism.
- C:** Hereditary diseases play a vital role in maintaining the ecological balance of human populations.
- D:** Most genetic diseases are controlled by a single, easily isolated gene.
