Section 1: Practice Questions

Reading Passage:

The ongoing debate surrounding imposing strict state regulations on decentralized cryptocurrencies has emerged as a central theme in modern Economics and Law. Proponents argue that its adoption represents a significant milestone, promising protecting consumers from market volatility and preventing money laundering and illicit financing. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of stifling technological innovation and undermining the individual sovereignty of decentralized networks. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: It would completely eliminate the need for any government oversight in Economics and Law.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- D: It has been universally endorsed by all legal and ethical scholars in Economics and Law.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That public opinion is always unified on matters of Economics and Law.
- B: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks
- C: That the financial cost of implementing the technology is completely negligible.
- D: That traditional methods have never successfully solved any of the problems in this area.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A: All transactions on public blockchains are completely invisible and untraceable.
- B: Most cryptocurrency users are using digital assets to buy physical real estate.
- C: Paper fiat currency is completely immune to inflation and currency manipulation.
- D: Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.

Reading Passage:

Few issues in contemporary Democratic Representation elicit as much controversy as the prospect of lowering the minimum voting age to sixteen in national elections. At the core of the supportive position lies the promise of engaging young people early in the democratic process and representing their stakes in long-term policy decisions. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding enfranchising individuals who may lack political maturity and are financially dependent on parents. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably combining the voting age reduction with mandatory civic education courses in schools. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of lowering the minimum voting age to sixteen in national elections?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It has been universally endorsed by all legal and ethical scholars in Democratic Representation.
- C: It would completely eliminate the need for any government oversight in Democratic Representation.
- D: sixteen-year-olds can work, pay taxes, and consent to medical treatment, so they should have a voice in parliament

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding lowering the minimum voting age to sixteen in national elections to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That public opinion is always unified on matters of Democratic Representation.
- C: That the financial cost of implementing the technology is completely negligible.
- D: civic education courses are capable of providing objective, non-partisan political training

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of lowering the minimum voting age to sixteen in national elections?

- A: All sixteen-year-olds pay income tax on their pocket money.
- B: No other country has ever permitted individuals under 18 to vote.
- C: Younger voters statistically turnout at higher rates than retirees.
- D: The debate centers on whether the capacity to contribute to society implies a right to govern it.

Reading Passage:

Few issues in contemporary Bioethics elicit as much controversy as the prospect of permitting the commercial sale of CRISPR germline editing. At the core of the supportive position lies the promise of eradicating severe hereditary genetic diseases and reducing long-term public health costs. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding creating a permanent genetic class divide where wealthy parents purchase cognitive and physical enhancements. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably creating strict regulatory frameworks that restrict modifications purely to therapeutic cures. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of permitting the commercial sale of CRISPR germline editing?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: it is a moral imperative to use biotechnology to spare future children from known genetic illnesses
- C: It has been universally endorsed by all legal and ethical scholars in Bioethics.
- D: It would completely eliminate the need for any government oversight in Bioethics.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding permitting the commercial sale of CRISPR germline editing to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: it is possible to maintain a clear and enforceable distinction between medical therapy and cosmetic enhancement
- D: That public opinion is always unified on matters of Bioethics.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of permitting the commercial sale of CRISPR germline editing?

- A:** Most genetic diseases are controlled by a single, easily isolated gene.
- B:** CRISPR-Cas9 is a highly theoretical tool that has never been tested in a laboratory.
- C:** Unregulated genetic modification risks translating economic inequality into biological determinism.
- D:** Hereditary diseases play a vital role in maintaining the ecological balance of human populations.
