Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=155> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Democratic Representation elicit as much controversy as the prospect of lowering the minimum voting age to sixteen in national elections. At the core of the supportive position lies the promise of engaging young people early in the democratic process and representing their stakes in long-term policy decisions. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of enfranchising individuals who may lack political maturity and are financially dependent on parents. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is combining the voting age reduction with mandatory civic education courses in schools. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of lowering the minimum voting age to sixteen in national elections?

- A: It would completely eliminate the need for any government oversight in Democratic Representation.
- B: sixteen-year-olds can work, pay taxes, and consent to medical treatment, so they should have a voice in parliament
- C: It has been universally endorsed by all legal and ethical scholars in Democratic Representation.
- D: It will guarantee immediate financial profits for all stakeholders involved.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding lowering the minimum voting age to sixteen in national elections to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That public opinion is always unified on matters of Democratic Representation.
- D: civic education courses are capable of providing objective, non-partisan political training

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of lowering the minimum voting age to sixteen in national elections?

- A: All sixteen-year-olds pay income tax on their pocket money.
- B: Younger voters statistically turnout at higher rates than retirees.
- C: The debate centers on whether the capacity to contribute to society implies a right to govern it.
- D: No other country has ever permitted individuals under 18 to vote.

Reading Passage:

The ongoing debate surrounding imposing strict state regulations on decentralized cryptocurrencies has emerged as a central theme in modern Economics and Law. Proponents argue that its adoption represents a significant milestone, promising protecting consumers from market volatility and preventing money laundering and illicit financing. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding stifling technological innovation and undermining the individual sovereignty of decentralized networks. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Economics and Law.
- D: It has been universally endorsed by all legal and ethical scholars in Economics and Law.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks
- D: That public opinion is always unified on matters of Economics and Law.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A: All transactions on public blockchains are completely invisible and untraceable.
- B: Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
- C: Paper fiat currency is completely immune to inflation and currency manipulation.
- D: Most cryptocurrency users are using digital assets to buy physical real estate.

Reading Passage:

Few issues in contemporary Social Policy elicit as much controversy as the prospect of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers. At the core of the supportive position lies the promise of ensuring all citizens have equal access to essential goods regardless of their market purchasing power. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of creating inefficient state monopolies and restricting individual consumer choice and flexibility. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably contracting service provision to private entities under strict, publicly managed quality caps. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: direct services protect vulnerable individuals from market exploitation and ensure money is spent on essential needs
- B: It has been universally endorsed by all legal and ethical scholars in Social Policy.
- C: It would completely eliminate the need for any government oversight in Social Policy.
- D: It will guarantee immediate financial profits for all stakeholders involved.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: the state can manage and deliver complex services more cost-effectively than private market competition
- C: That public opinion is always unified on matters of Social Policy.
- D: That traditional methods have never successfully solved any of the problems in this area.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A:** Free public transport has never been attempted in any European city.
- B:** High-income earners are legally excluded from using public healthcare systems.
- C:** Cash transfers are administratively more expensive than building public hospitals.
- D:** The dispute highlights a tension between state-managed welfare equity and individual consumer autonomy.
