Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=160> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Economics and Law elicit as much controversy as the prospect of imposing strict state regulations on decentralized cryptocurrencies. At the core of the supportive position lies the promise of protecting consumers from market volatility and preventing money laundering and illicit financing. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding stifling technological innovation and undermining the individual sovereignty of decentralized networks. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It has been universally endorsed by all legal and ethical scholars in Economics and Law.
- D: It would completely eliminate the need for any government oversight in Economics and Law.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That public opinion is always unified on matters of Economics and Law.
- C: That the financial cost of implementing the technology is completely negligible.
- D: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A: Paper fiat currency is completely immune to inflation and currency manipulation.
- B: Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
- C: Most cryptocurrency users are using digital assets to buy physical real estate.
- D: All transactions on public blockchains are completely invisible and untraceable.

Reading Passage:

Few issues in contemporary Civil Liberties elicit as much controversy as the prospect of deploying live facial recognition in public street cameras. At the core of the supportive position lies the promise of the rapid identification of wanted criminals and preventing public security threats. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of eroding the right to privacy, chilling public assembly, and creating a state of perpetual surveillance. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring judicial warrants before cross-referencing surveillance feeds against database watchlists. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of deploying live facial recognition in public street cameras?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It has been universally endorsed by all legal and ethical scholars in Civil Liberties.
- C: Law-abiding citizens have no reason to fear public surveillance if it significantly reduces violent crime rates.
- D: It would completely eliminate the need for any government oversight in Civil Liberties.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding deploying live facial recognition in public street cameras to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: Surveillance systems are highly accurate and free from false-positive demographic biases.
- C: That the financial cost of implementing the technology is completely negligible.
- D: That public opinion is always unified on matters of Civil Liberties.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of deploying live facial recognition in public street cameras?

- A: Private security guards have the same legal arrest powers as police officers.
- B: Mass surveillance represents a fundamental shift in the presumption of innocence in public spaces.
- C: Camera footage is automatically deleted after 24 hours in all jurisdictions.
- D: Facial recognition is only capable of identifying people wearing masks.

Reading Passage:

Few issues in contemporary Political Philosophy elicit as much controversy as the prospect of compulsory voting in national elections. At the core of the supportive position lies the promise of enhanced democratic legitimacy and broader representation of marginalized groups. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding infringing upon individual liberty and forcing politically disengaged citizens to make arbitrary choices. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is mandating turnout at the polls while including a prominent 'None of the Above' option on the ballot. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of compulsory voting in national elections?

- A: It has been universally endorsed by all legal and ethical scholars in Political Philosophy.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Political Philosophy.
- D: voting is a civic obligation comparable to tax paying or jury service, which benefits the collective

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding compulsory voting in national elections to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That public opinion is always unified on matters of Political Philosophy.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: higher voter turnout directly correlates with a more responsive and accountable government

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of compulsory voting in national elections?

- A:** Forced participation may compromise the qualitative value of the democratic mandate.
- B:** Compulsory voting always results in the election of radical political candidates.
- C:** Uninformed voters are statistically more likely to vote for conservative policies.
- D:** Most democratic countries have already banned voluntary voting systems.
