# Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=163> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

## ■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

# Section 1: Practice Questions

## Reading Passage:

*The ongoing debate surrounding implementing a state-funded Universal Basic Income (UBI) has emerged as a central theme in modern Socio-Economics. Proponents argue that its adoption represents a significant milestone, promising the eradication of extreme poverty and providing a safety net against automation-induced job loss. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.*

*However, this enthusiasm is tempered by warnings from critics who raise concerns regarding disincentivizing workforce participation and placing an unsustainable fiscal burden on the treasury. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.*

*An intermediate solution often proposed is funding the program through carbon taxes and sovereign wealth fund dividends. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.*

### Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of implementing a state-funded Universal Basic Income (UBI)?

- A: It has been universally endorsed by all legal and ethical scholars in Socio-Economics.
- B: giving citizens direct cash transfers restores their bargaining power and individual dignity
- C: It would completely eliminate the need for any government oversight in Socio-Economics.
- D: It will guarantee immediate financial profits for all stakeholders involved.

### Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding implementing a state-funded Universal Basic Income (UBI) to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That public opinion is always unified on matters of Socio-Economics.
- D: the majority of individuals will continue to engage in productive or creative work even when survival is guaranteed

**Question 3 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of implementing a state-funded Universal Basic Income (UBI)?

- A: Automation has already eliminated 90% of all administrative jobs.
- B: A UBI shifts the balance of power from employers to workers by providing an exit option.
- C: A UBI would immediately cause hyperinflation, rendering the currency worthless.
- D: Only high-income individuals would benefit from a flat-rate cash transfer.

**Reading Passage:**

*Few issues in contemporary Bioethics elicit as much controversy as the prospect of permitting the commercial sale of CRISPR germline editing. At the core of the supportive position lies the promise of eradicating severe hereditary genetic diseases and reducing long-term public health costs. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.*

*However, this enthusiasm is tempered by warnings from critics who raise concerns regarding creating a permanent genetic class divide where wealthy parents purchase cognitive and physical enhancements. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.*

*To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably creating strict regulatory frameworks that restrict modifications purely to therapeutic cures. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.*

**Question 4 — [Section A / Reading Comprehension]**

According to the passage, which of the following best represents the primary benefit claimed by the proponents of permitting the commercial sale of CRISPR germline editing?

- A: It would completely eliminate the need for any government oversight in Bioethics.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It has been universally endorsed by all legal and ethical scholars in Bioethics.
- D: It is a moral imperative to use biotechnology to spare future children from known genetic illnesses

**Question 5 — [Section A / Reading Comprehension]**

Which of the following assumptions is necessary for the proponents' argument regarding permitting the commercial sale of CRISPR germline editing to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: It is possible to maintain a clear and enforceable distinction between medical therapy and cosmetic enhancement
- C: That the financial cost of implementing the technology is completely negligible.
- D: That public opinion is always unified on matters of Bioethics.

**Question 6 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of permitting the commercial sale of CRISPR germline editing?

- A: Hereditary diseases play a vital role in maintaining the ecological balance of human populations.
- B: Unregulated genetic modification risks translating economic inequality into biological determinism.
- C: CRISPR-Cas9 is a highly theoretical tool that has never been tested in a laboratory.
- D: Most genetic diseases are controlled by a single, easily isolated gene.

**Reading Passage:**

*Few issues in contemporary Science and Society elicit as much controversy as the prospect of state funding for crewed space exploration programs. At the core of the supportive position lies the promise of stimulating technological innovation and securing the long-term survival of the human species. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.*

*However, this enthusiasm is tempered by warnings from critics who raise concerns regarding diverting critical capital from urgent domestic crises like poverty, education, and healthcare. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.*

*An intermediate solution often proposed is incentivizing public-private partnerships where private companies bear the primary exploration costs. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.*

**Question 7 — [Section A / Reading Comprehension]**

According to the passage, which of the following best represents the primary benefit claimed by the proponents of state funding for crewed space exploration programs?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It would completely eliminate the need for any government oversight in Science and Society.
- C: the technological spinoffs of space travel have historically revolutionized medicine, computing, and communications
- D: It has been universally endorsed by all legal and ethical scholars in Science and Society.

**Question 8 — [Section A / Reading Comprehension]**

Which of the following assumptions is necessary for the proponents' argument regarding state funding for crewed space exploration programs to stand?

- A: scientific breakthroughs achieved in space exploration cannot be replicated through direct terrestrial research
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: That the financial cost of implementing the technology is completely negligible.
- D: That public opinion is always unified on matters of Science and Society.

**Question 9 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of state funding for crewed space exploration programs?

- A:** The debate reflects a clash between immediate humanitarian duties and long-term scientific aspiration.
- B:** Public space programs cost more than 50% of the national budget.
- C:** Private aerospace companies are legally prohibited from launching commercial satellites.
- D:** We have already established self-sustaining colonies on Mars.

# Submit Answers & Check worked Solutions

## ■ Section Complete!

You have completed this practice exam paper. To check your answers and view step-by-step worked explanations:

■ Go to: <https://applaa.com/practice/check?exam=lnat&paper;=163>

Simply bubble in your choices (e.g. A, B, C, D) and get instantly scored! You can then review the explanations or chat with Appy Buddy (AI Socratic tutor) to understand complex concepts.
