Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=166> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Social Policy elicit as much controversy as the prospect of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers. At the core of the supportive position lies the promise of ensuring all citizens have equal access to essential goods regardless of their market purchasing power. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding creating inefficient state monopolies and restricting individual consumer choice and flexibility. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is contracting service provision to private entities under strict, publicly managed quality caps. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It would completely eliminate the need for any government oversight in Social Policy.
- C: direct services protect vulnerable individuals from market exploitation and ensure money is spent on essential needs
- D: It has been universally endorsed by all legal and ethical scholars in Social Policy.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: the state can manage and deliver complex services more cost-effectively than private market competition
- D: That public opinion is always unified on matters of Social Policy.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: Free public transport has never been attempted in any European city.
- B: Cash transfers are administratively more expensive than building public hospitals.
- C: High-income earners are legally excluded from using public healthcare systems.
- D: The dispute highlights a tension between state-managed welfare equity and individual consumer autonomy.

Reading Passage:

Few issues in contemporary Science and Society elicit as much controversy as the prospect of state funding for crewed space exploration programs. At the core of the supportive position lies the promise of stimulating technological innovation and securing the long-term survival of the human species. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding diverting critical capital from urgent domestic crises like poverty, education, and healthcare. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is incentivizing public-private partnerships where private companies bear the primary exploration costs. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of state funding for crewed space exploration programs?

- A: It would completely eliminate the need for any government oversight in Science and Society.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It has been universally endorsed by all legal and ethical scholars in Science and Society.
- D: the technological spinoffs of space travel have historically revolutionized medicine, computing, and communications

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding state funding for crewed space exploration programs to stand?

- A: scientific breakthroughs achieved in space exploration cannot be replicated through direct terrestrial research
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: That public opinion is always unified on matters of Science and Society.
- D: That the financial cost of implementing the technology is completely negligible.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of state funding for crewed space exploration programs?

- A: Public space programs cost more than 50% of the national budget.
- B: The debate reflects a clash between immediate humanitarian duties and long-term scientific aspiration.
- C: We have already established self-sustaining colonies on Mars.
- D: Private aerospace companies are legally prohibited from launching commercial satellites.

Reading Passage:

Few issues in contemporary Political Philosophy elicit as much controversy as the prospect of compulsory voting in national elections. At the core of the supportive position lies the promise of enhanced democratic legitimacy and broader representation of marginalized groups. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of infringing upon individual liberty and forcing politically disengaged citizens to make arbitrary choices. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is mandating turnout at the polls while including a prominent 'None of the Above' option on the ballot. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of compulsory voting in national elections?

- A: voting is a civic obligation comparable to tax paying or jury service, which benefits the collective
- B: It would completely eliminate the need for any government oversight in Political Philosophy.
- C: It has been universally endorsed by all legal and ethical scholars in Political Philosophy.
- D: It will guarantee immediate financial profits for all stakeholders involved.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding compulsory voting in national elections to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That public opinion is always unified on matters of Political Philosophy.
- C: That the financial cost of implementing the technology is completely negligible.
- D: higher voter turnout directly correlates with a more responsive and accountable government

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of compulsory voting in national elections?

- A:** Uninformed voters are statistically more likely to vote for conservative policies.
- B:** Forced participation may compromise the qualitative value of the democratic mandate.
- C:** Compulsory voting always results in the election of radical political candidates.
- D:** Most democratic countries have already banned voluntary voting systems.
