Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=167> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

The ongoing debate surrounding AI-driven judicial sentencing algorithms has emerged as a central theme in modern Technology and Law. Proponents argue that its adoption represents a significant milestone, promising the elimination of human bias and greater consistency in judicial sentencing. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding perpetuating historical prejudices embedded in the training data and violating procedural transparency. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is implementing audit protocols that force algorithms to explain their decision-making logic. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of AI-driven judicial sentencing algorithms?

- A: It would completely eliminate the need for any government oversight in Technology and Law.
- B: It has been universally endorsed by all legal and ethical scholars in Technology and Law.
- C: It will guarantee immediate financial profits for all stakeholders involved.
- D: automated decision systems can process massive volumes of case law faster and more consistently than human judges

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding AI-driven judicial sentencing algorithms to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That the financial cost of implementing the technology is completely negligible.
- C: historical sentencing databases contain patterns that are appropriate to replicate in future rulings
- D: That public opinion is always unified on matters of Technology and Law.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of AI-driven judicial sentencing algorithms?

- A:** Algorithms risk encoding past discriminatory practices under the guise of statistical objectivity.
- B:** Historical sentencing data contains no patterns of racial or economic disparity.
- C:** Judges will be completely replaced by robots within the next five years.
- D:** AI systems are physically incapable of processing complex legal briefs.

Reading Passage:

The ongoing debate surrounding state funding for crewed space exploration programs has emerged as a central theme in modern Science and Society. Proponents argue that its adoption represents a significant milestone, promising stimulating technological innovation and securing the long-term survival of the human species. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of diverting critical capital from urgent domestic crises like poverty, education, and healthcare. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is incentivizing public-private partnerships where private companies bear the primary exploration costs. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of state funding for crewed space exploration programs?

- A:** It will guarantee immediate financial profits for all stakeholders involved.
- B:** It would completely eliminate the need for any government oversight in Science and Society.
- C:** It has been universally endorsed by all legal and ethical scholars in Science and Society.
- D:** the technological spinoffs of space travel have historically revolutionized medicine, computing, and communications

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding state funding for crewed space exploration programs to stand?

- A:** scientific breakthroughs achieved in space exploration cannot be replicated through direct terrestrial research
- B:** That public opinion is always unified on matters of Science and Society.
- C:** That the financial cost of implementing the technology is completely negligible.
- D:** That traditional methods have never successfully solved any of the problems in this area.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of state funding for crewed space exploration programs?

- A: Public space programs cost more than 50% of the national budget.
- B: We have already established self-sustaining colonies on Mars.
- C: The debate reflects a clash between immediate humanitarian duties and long-term scientific aspiration.
- D: Private aerospace companies are legally prohibited from launching commercial satellites.

Reading Passage:

The ongoing debate surrounding implementing a state-funded Universal Basic Income (UBI) has emerged as a central theme in modern Socio-Economics. Proponents argue that its adoption represents a significant milestone, promising the eradication of extreme poverty and providing a safety net against automation-induced job loss. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of disincentivizing workforce participation and placing an unsustainable fiscal burden on the treasury. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is funding the program through carbon taxes and sovereign wealth fund dividends. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of implementing a state-funded Universal Basic Income (UBI)?

- A: giving citizens direct cash transfers restores their bargaining power and individual dignity
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Socio-Economics.
- D: It has been universally endorsed by all legal and ethical scholars in Socio-Economics.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding implementing a state-funded Universal Basic Income (UBI) to stand?

- A: the majority of individuals will continue to engage in productive or creative work even when survival is guaranteed
- B: That public opinion is always unified on matters of Socio-Economics.
- C: That the financial cost of implementing the technology is completely negligible.
- D: That traditional methods have never successfully solved any of the problems in this area.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of implementing a state-funded Universal Basic Income (UBI)?

- A:** Only high-income individuals would benefit from a flat-rate cash transfer.
- B:** A UBI would immediately cause hyperinflation, rendering the currency worthless.
- C:** A UBI shifts the balance of power from employers to workers by providing an exit option.
- D:** Automation has already eliminated 90% of all administrative jobs.
