Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=201> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

The ongoing debate surrounding giving historic preservation laws veto power over urban housing developments has emerged as a central theme in modern Culture and Urbanism. Proponents argue that its adoption represents a significant milestone, promising preserving cultural heritage and maintaining the unique aesthetic identity of historic cities. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding restricting the supply of modern, affordable housing and driving up real estate costs for residents. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is permitting the conversion of historic facades while allowing modern construction behind them. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of giving historic preservation laws veto power over urban housing developments?

- A: It has been universally endorsed by all legal and ethical scholars in Culture and Urbanism.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: once a historic building is demolished, a piece of communal memory and architectural history is lost forever
- D: It would completely eliminate the need for any government oversight in Culture and Urbanism.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding giving historic preservation laws veto power over urban housing developments to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: affordable housing demands cannot be met by building on non-historic outer city sites (greenfield land)
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: That public opinion is always unified on matters of Culture and Urbanism.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of giving historic preservation laws veto power over urban housing developments?

- A: Building housing always results in a net decrease in local economic activity.
- B: Historic buildings are structurally safer than modern steel skyscrapers.
- C: Preservation policies reflect a prioritisation of collective memory over immediate economic utility.
- D: No private developer has ever agreed to restore a listed landmark.

Reading Passage:

The ongoing debate surrounding lowering the minimum voting age to sixteen in national elections has emerged as a central theme in modern Democratic Representation. Proponents argue that its adoption represents a significant milestone, promising engaging young people early in the democratic process and representing their stakes in long-term policy decisions. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding enfranchising individuals who may lack political maturity and are financially dependent on parents. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is combining the voting age reduction with mandatory civic education courses in schools. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of lowering the minimum voting age to sixteen in national elections?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It has been universally endorsed by all legal and ethical scholars in Democratic Representation.
- C: sixteen-year-olds can work, pay taxes, and consent to medical treatment, so they should have a voice in parliament
- D: It would completely eliminate the need for any government oversight in Democratic Representation.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding lowering the minimum voting age to sixteen in national elections to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: civic education courses are capable of providing objective, non-partisan political training
- C: That the financial cost of implementing the technology is completely negligible.
- D: That public opinion is always unified on matters of Democratic Representation.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of lowering the minimum voting age to sixteen in national elections?

- A: The debate centers on whether the capacity to contribute to society implies a right to govern it.
- B: No other country has ever permitted individuals under 18 to vote.
- C: Younger voters statistically turnout at higher rates than retirees.
- D: All sixteen-year-olds pay income tax on their pocket money.

Reading Passage:

The ongoing debate surrounding imposing strict state regulations on decentralized cryptocurrencies has emerged as a central theme in modern Economics and Law. Proponents argue that its adoption represents a significant milestone, promising protecting consumers from market volatility and preventing money laundering and illicit financing. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding stifling technological innovation and undermining the individual sovereignty of decentralized networks. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: It would completely eliminate the need for any government oversight in Economics and Law.
- B: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- C: It will guarantee immediate financial profits for all stakeholders involved.
- D: It has been universally endorsed by all legal and ethical scholars in Economics and Law.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That public opinion is always unified on matters of Economics and Law.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: That the financial cost of implementing the technology is completely negligible.
- D: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A:** Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
- B:** Paper fiat currency is completely immune to inflation and currency manipulation.
- C:** Most cryptocurrency users are using digital assets to buy physical real estate.
- D:** All transactions on public blockchains are completely invisible and untraceable.
