Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=237> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Social Policy elicit as much controversy as the prospect of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers. At the core of the supportive position lies the promise of ensuring all citizens have equal access to essential goods regardless of their market purchasing power. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding creating inefficient state monopolies and restricting individual consumer choice and flexibility. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably contracting service provision to private entities under strict, publicly managed quality caps. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: direct services protect vulnerable individuals from market exploitation and ensure money is spent on essential needs
- B: It would completely eliminate the need for any government oversight in Social Policy.
- C: It has been universally endorsed by all legal and ethical scholars in Social Policy.
- D: It will guarantee immediate financial profits for all stakeholders involved.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: That public opinion is always unified on matters of Social Policy.
- D: the state can manage and deliver complex services more cost-effectively than private market competition

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: Cash transfers are administratively more expensive than building public hospitals.
- B: The dispute highlights a tension between state-managed welfare equity and individual consumer autonomy.
- C: Free public transport has never been attempted in any European city.
- D: High-income earners are legally excluded from using public healthcare systems.

Reading Passage:

The ongoing debate surrounding deploying live facial recognition in public street cameras has emerged as a central theme in modern Civil Liberties. Proponents argue that its adoption represents a significant milestone, promising the rapid identification of wanted criminals and preventing public security threats. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding eroding the right to privacy, chilling public assembly, and creating a state of perpetual surveillance. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring judicial warrants before cross-referencing surveillance feeds against database watchlists. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of deploying live facial recognition in public street cameras?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It has been universally endorsed by all legal and ethical scholars in Civil Liberties.
- C: Law-abiding citizens have no reason to fear public surveillance if it significantly reduces violent crime rates.
- D: It would completely eliminate the need for any government oversight in Civil Liberties.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding deploying live facial recognition in public street cameras to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: Surveillance systems are highly accurate and free from false-positive demographic biases.
- C: That public opinion is always unified on matters of Civil Liberties.
- D: That the financial cost of implementing the technology is completely negligible.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of deploying live facial recognition in public street cameras?

- A: Camera footage is automatically deleted after 24 hours in all jurisdictions.
- B: Private security guards have the same legal arrest powers as police officers.
- C: Mass surveillance represents a fundamental shift in the presumption of innocence in public spaces.
- D: Facial recognition is only capable of identifying people wearing masks.

Reading Passage:

The ongoing debate surrounding imposing strict state regulations on decentralized cryptocurrencies has emerged as a central theme in modern Economics and Law. Proponents argue that its adoption represents a significant milestone, promising protecting consumers from market volatility and preventing money laundering and illicit financing. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding stifling technological innovation and undermining the individual sovereignty of decentralized networks. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: It has been universally endorsed by all legal and ethical scholars in Economics and Law.
- B: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- C: It will guarantee immediate financial profits for all stakeholders involved.
- D: It would completely eliminate the need for any government oversight in Economics and Law.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That public opinion is always unified on matters of Economics and Law.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A:** Most cryptocurrency users are using digital assets to buy physical real estate.
- B:** All transactions on public blockchains are completely invisible and untraceable.
- C:** Paper fiat currency is completely immune to inflation and currency manipulation.
- D:** Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
