Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=242> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

The ongoing debate surrounding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers has emerged as a central theme in modern Social Policy. Proponents argue that its adoption represents a significant milestone, promising ensuring all citizens have equal access to essential goods regardless of their market purchasing power. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding creating inefficient state monopolies and restricting individual consumer choice and flexibility. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably contracting service provision to private entities under strict, publicly managed quality caps. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: It would completely eliminate the need for any government oversight in Social Policy.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It has been universally endorsed by all legal and ethical scholars in Social Policy.
- D: direct services protect vulnerable individuals from market exploitation and ensure money is spent on essential needs

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That public opinion is always unified on matters of Social Policy.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: the state can manage and deliver complex services more cost-effectively than private market competition

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: The dispute highlights a tension between state-managed welfare equity and individual consumer autonomy.
- B: Cash transfers are administratively more expensive than building public hospitals.
- C: High-income earners are legally excluded from using public healthcare systems.
- D: Free public transport has never been attempted in any European city.

Reading Passage:

Few issues in contemporary Democratic Representation elicit as much controversy as the prospect of lowering the minimum voting age to sixteen in national elections. At the core of the supportive position lies the promise of engaging young people early in the democratic process and representing their stakes in long-term policy decisions. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding enfranchising individuals who may lack political maturity and are financially dependent on parents. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably combining the voting age reduction with mandatory civic education courses in schools. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of lowering the minimum voting age to sixteen in national elections?

- A: sixteen-year-olds can work, pay taxes, and consent to medical treatment, so they should have a voice in parliament
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Democratic Representation.
- D: It has been universally endorsed by all legal and ethical scholars in Democratic Representation.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding lowering the minimum voting age to sixteen in national elections to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That public opinion is always unified on matters of Democratic Representation.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: civic education courses are capable of providing objective, non-partisan political training

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of lowering the minimum voting age to sixteen in national elections?

- A: Younger voters statistically turnout at higher rates than retirees.
- B: The debate centers on whether the capacity to contribute to society implies a right to govern it.
- C: All sixteen-year-olds pay income tax on their pocket money.
- D: No other country has ever permitted individuals under 18 to vote.

Reading Passage:

Few issues in contemporary Civil Liberties elicit as much controversy as the prospect of deploying live facial recognition in public street cameras. At the core of the supportive position lies the promise of the rapid identification of wanted criminals and preventing public security threats. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding eroding the right to privacy, chilling public assembly, and creating a state of perpetual surveillance. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is requiring judicial warrants before cross-referencing surveillance feeds against database watchlists. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of deploying live facial recognition in public street cameras?

- A: It would completely eliminate the need for any government oversight in Civil Liberties.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: law-abiding citizens have no reason to fear public surveillance if it significantly reduces violent crime rates
- D: It has been universally endorsed by all legal and ethical scholars in Civil Liberties.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding deploying live facial recognition in public street cameras to stand?

- A: That public opinion is always unified on matters of Civil Liberties.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: surveillance systems are highly accurate and free from false-positive demographic biases
- D: That the financial cost of implementing the technology is completely negligible.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of deploying live facial recognition in public street cameras?

- A:** Mass surveillance represents a fundamental shift in the presumption of innocence in public spaces.
- B:** Camera footage is automatically deleted after 24 hours in all jurisdictions.
- C:** Private security guards have the same legal arrest powers as police officers.
- D:** Facial recognition is only capable of identifying people wearing masks.
