Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=247> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

The ongoing debate surrounding implementing a state-funded Universal Basic Income (UBI) has emerged as a central theme in modern Socio-Economics. Proponents argue that its adoption represents a significant milestone, promising the eradication of extreme poverty and providing a safety net against automation-induced job loss. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of disincentivizing workforce participation and placing an unsustainable fiscal burden on the treasury. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is funding the program through carbon taxes and sovereign wealth fund dividends. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of implementing a state-funded Universal Basic Income (UBI)?

- A: It has been universally endorsed by all legal and ethical scholars in Socio-Economics.
- B: It would completely eliminate the need for any government oversight in Socio-Economics.
- C: giving citizens direct cash transfers restores their bargaining power and individual dignity
- D: It will guarantee immediate financial profits for all stakeholders involved.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding implementing a state-funded Universal Basic Income (UBI) to stand?

- A: the majority of individuals will continue to engage in productive or creative work even when survival is guaranteed
- B: That public opinion is always unified on matters of Socio-Economics.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: That the financial cost of implementing the technology is completely negligible.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of implementing a state-funded Universal Basic Income (UBI)?

- A: A UBI shifts the balance of power from employers to workers by providing an exit option.
- B: A UBI would immediately cause hyperinflation, rendering the currency worthless.
- C: Automation has already eliminated 90% of all administrative jobs.
- D: Only high-income individuals would benefit from a flat-rate cash transfer.

Reading Passage:

Few issues in contemporary Economics and Law elicit as much controversy as the prospect of imposing strict state regulations on decentralized cryptocurrencies. At the core of the supportive position lies the promise of protecting consumers from market volatility and preventing money laundering and illicit financing. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of stifling technological innovation and undermining the individual sovereignty of decentralized networks. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It would completely eliminate the need for any government oversight in Economics and Law.
- C: It has been universally endorsed by all legal and ethical scholars in Economics and Law.
- D: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That public opinion is always unified on matters of Economics and Law.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A: Most cryptocurrency users are using digital assets to buy physical real estate.
- B: Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
- C: All transactions on public blockchains are completely invisible and untraceable.
- D: Paper fiat currency is completely immune to inflation and currency manipulation.

Reading Passage:

The ongoing debate surrounding state funding for crewed space exploration programs has emerged as a central theme in modern Science and Society. Proponents argue that its adoption represents a significant milestone, promising stimulating technological innovation and securing the long-term survival of the human species. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of diverting critical capital from urgent domestic crises like poverty, education, and healthcare. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is incentivizing public-private partnerships where private companies bear the primary exploration costs. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of state funding for crewed space exploration programs?

- A: the technological spinoffs of space travel have historically revolutionized medicine, computing, and communications
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Science and Society.
- D: It has been universally endorsed by all legal and ethical scholars in Science and Society.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding state funding for crewed space exploration programs to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That public opinion is always unified on matters of Science and Society.
- C: That the financial cost of implementing the technology is completely negligible.
- D: scientific breakthroughs achieved in space exploration cannot be replicated through direct terrestrial research

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of state funding for crewed space exploration programs?

- A:** Public space programs cost more than 50% of the national budget.
- B:** Private aerospace companies are legally prohibited from launching commercial satellites.
- C:** We have already established self-sustaining colonies on Mars.
- D:** The debate reflects a clash between immediate humanitarian duties and long-term scientific aspiration.
