Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=47> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

The ongoing debate surrounding lowering the minimum voting age to sixteen in national elections has emerged as a central theme in modern Democratic Representation. Proponents argue that its adoption represents a significant milestone, promising engaging young people early in the democratic process and representing their stakes in long-term policy decisions. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of enfranchising individuals who may lack political maturity and are financially dependent on parents. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably combining the voting age reduction with mandatory civic education courses in schools. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of lowering the minimum voting age to sixteen in national elections?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It would completely eliminate the need for any government oversight in Democratic Representation.
- C: It has been universally endorsed by all legal and ethical scholars in Democratic Representation.
- D: sixteen-year-olds can work, pay taxes, and consent to medical treatment, so they should have a voice in parliament

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding lowering the minimum voting age to sixteen in national elections to stand?

- A: That public opinion is always unified on matters of Democratic Representation.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: That the financial cost of implementing the technology is completely negligible.
- D: civic education courses are capable of providing objective, non-partisan political training

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of lowering the minimum voting age to sixteen in national elections?

- A: All sixteen-year-olds pay income tax on their pocket money.
- B: Younger voters statistically turnout at higher rates than retirees.
- C: The debate centers on whether the capacity to contribute to society implies a right to govern it.
- D: No other country has ever permitted individuals under 18 to vote.

Reading Passage:

The ongoing debate surrounding deploying live facial recognition in public street cameras has emerged as a central theme in modern Civil Liberties. Proponents argue that its adoption represents a significant milestone, promising the rapid identification of wanted criminals and preventing public security threats. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding eroding the right to privacy, chilling public assembly, and creating a state of perpetual surveillance. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring judicial warrants before cross-referencing surveillance feeds against database watchlists. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of deploying live facial recognition in public street cameras?

- A: It has been universally endorsed by all legal and ethical scholars in Civil Liberties.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Civil Liberties.
- D: Law-abiding citizens have no reason to fear public surveillance if it significantly reduces violent crime rates

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding deploying live facial recognition in public street cameras to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: Surveillance systems are highly accurate and free from false-positive demographic biases
- D: That public opinion is always unified on matters of Civil Liberties.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of deploying live facial recognition in public street cameras?

- A: Facial recognition is only capable of identifying people wearing masks.
- B: Mass surveillance represents a fundamental shift in the presumption of innocence in public spaces.
- C: Private security guards have the same legal arrest powers as police officers.
- D: Camera footage is automatically deleted after 24 hours in all jurisdictions.

Reading Passage:

Few issues in contemporary Political Philosophy elicit as much controversy as the prospect of compulsory voting in national elections. At the core of the supportive position lies the promise of enhanced democratic legitimacy and broader representation of marginalized groups. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of infringing upon individual liberty and forcing politically disengaged citizens to make arbitrary choices. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably mandating turnout at the polls while including a prominent 'None of the Above' option on the ballot. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of compulsory voting in national elections?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It would completely eliminate the need for any government oversight in Political Philosophy.
- C: It has been universally endorsed by all legal and ethical scholars in Political Philosophy.
- D: voting is a civic obligation comparable to tax paying or jury service, which benefits the collective

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding compulsory voting in national elections to stand?

- A: That public opinion is always unified on matters of Political Philosophy.
- B: higher voter turnout directly correlates with a more responsive and accountable government
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: That the financial cost of implementing the technology is completely negligible.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of compulsory voting in national elections?

- A:** Uninformed voters are statistically more likely to vote for conservative policies.
- B:** Forced participation may compromise the qualitative value of the democratic mandate.
- C:** Most democratic countries have already banned voluntary voting systems.
- D:** Compulsory voting always results in the election of radical political candidates.
