# Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=53> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

## ■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

# Section 1: Practice Questions

## Reading Passage:

*The ongoing debate surrounding AI-driven judicial sentencing algorithms has emerged as a central theme in modern Technology and Law. Proponents argue that its adoption represents a significant milestone, promising the elimination of human bias and greater consistency in judicial sentencing. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.*

*On the other hand, a substantial body of criticism focuses on the risk of perpetuating historical prejudices embedded in the training data and violating procedural transparency. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.*

*An intermediate solution often proposed is implementing audit protocols that force algorithms to explain their decision-making logic. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.*

### Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of AI-driven judicial sentencing algorithms?

- A:** automated decision systems can process massive volumes of case law faster and more consistently than human judges
- B:** It will guarantee immediate financial profits for all stakeholders involved.
- C:** It has been universally endorsed by all legal and ethical scholars in Technology and Law.
- D:** It would completely eliminate the need for any government oversight in Technology and Law.

### Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding AI-driven judicial sentencing algorithms to stand?

- A:** That the financial cost of implementing the technology is completely negligible.
- B:** That public opinion is always unified on matters of Technology and Law.
- C:** That traditional methods have never successfully solved any of the problems in this area.
- D:** historical sentencing databases contain patterns that are appropriate to replicate in future rulings

**Question 3 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of AI-driven judicial sentencing algorithms?

- A: Historical sentencing data contains no patterns of racial or economic disparity.
- B: Algorithms risk encoding past discriminatory practices under the guise of statistical objectivity.
- C: Judges will be completely replaced by robots within the next five years.
- D: AI systems are physically incapable of processing complex legal briefs.

**Reading Passage:**

*The ongoing debate surrounding implementing a state-funded Universal Basic Income (UBI) has emerged as a central theme in modern Socio-Economics. Proponents argue that its adoption represents a significant milestone, promising the eradication of extreme poverty and providing a safety net against automation-induced job loss. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.*

*On the other hand, a substantial body of criticism focuses on the risk of disincentivizing workforce participation and placing an unsustainable fiscal burden on the treasury. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.*

*To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably funding the program through carbon taxes and sovereign wealth fund dividends. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.*

**Question 4 — [Section A / Reading Comprehension]**

According to the passage, which of the following best represents the primary benefit claimed by the proponents of implementing a state-funded Universal Basic Income (UBI)?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: giving citizens direct cash transfers restores their bargaining power and individual dignity
- C: It would completely eliminate the need for any government oversight in Socio-Economics.
- D: It has been universally endorsed by all legal and ethical scholars in Socio-Economics.

**Question 5 — [Section A / Reading Comprehension]**

Which of the following assumptions is necessary for the proponents' argument regarding implementing a state-funded Universal Basic Income (UBI) to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That public opinion is always unified on matters of Socio-Economics.
- C: the majority of individuals will continue to engage in productive or creative work even when survival is guaranteed
- D: That the financial cost of implementing the technology is completely negligible.

**Question 6 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of implementing a state-funded Universal Basic Income (UBI)?

- A: A UBI shifts the balance of power from employers to workers by providing an exit option.
- B: A UBI would immediately cause hyperinflation, rendering the currency worthless.
- C: Only high-income individuals would benefit from a flat-rate cash transfer.
- D: Automation has already eliminated 90% of all administrative jobs.

**Reading Passage:**

*Few issues in contemporary Economics and Law elicit as much controversy as the prospect of imposing strict state regulations on decentralized cryptocurrencies. At the core of the supportive position lies the promise of protecting consumers from market volatility and preventing money laundering and illicit financing. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.*

*On the other hand, a substantial body of criticism focuses on the risk of stifling technological innovation and undermining the individual sovereignty of decentralized networks. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.*

*To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.*

**Question 7 — [Section A / Reading Comprehension]**

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- B: It has been universally endorsed by all legal and ethical scholars in Economics and Law.
- C: It would completely eliminate the need for any government oversight in Economics and Law.
- D: It will guarantee immediate financial profits for all stakeholders involved.

**Question 8 — [Section A / Reading Comprehension]**

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That public opinion is always unified on matters of Economics and Law.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: That the financial cost of implementing the technology is completely negligible.
- D: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks

**Question 9 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A:** Most cryptocurrency users are using digital assets to buy physical real estate.
- B:** Paper fiat currency is completely immune to inflation and currency manipulation.
- C:** Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
- D:** All transactions on public blockchains are completely invisible and untraceable.

# Submit Answers & Check worked Solutions

## ■ Section Complete!

You have completed this practice exam paper. To check your answers and view step-by-step worked explanations:

■ Go to: <https://applaa.com/practice/check?exam=lnat&paper;=53>

Simply bubble in your choices (e.g. A, B, C, D) and get instantly scored! You can then review the explanations or chat with Appy Buddy (AI Socratic tutor) to understand complex concepts.
