# Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper=6> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

## ■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

# Section 1: Practice Questions

## Reading Passage:

*Few issues in contemporary Economics and Law elicit as much controversy as the prospect of imposing strict state regulations on decentralized cryptocurrencies. At the core of the supportive position lies the promise of protecting consumers from market volatility and preventing money laundering and illicit financing. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.*

*On the other hand, a substantial body of criticism focuses on the risk of stifling technological innovation and undermining the individual sovereignty of decentralized networks. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.*

*An intermediate solution often proposed is requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.*

### Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It would completely eliminate the need for any government oversight in Economics and Law.
- C: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- D: It has been universally endorsed by all legal and ethical scholars in Economics and Law.

### Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That public opinion is always unified on matters of Economics and Law.
- D: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks

**Question 3 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A: All transactions on public blockchains are completely invisible and untraceable.
- B: Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.
- C: Paper fiat currency is completely immune to inflation and currency manipulation.
- D: Most cryptocurrency users are using digital assets to buy physical real estate.

**Reading Passage:**

*Few issues in contemporary Culture and Urbanism elicit as much controversy as the prospect of giving historic preservation laws veto power over urban housing developments. At the core of the supportive position lies the promise of preserving cultural heritage and maintaining the unique aesthetic identity of historic cities. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.*

*On the other hand, a substantial body of criticism focuses on the risk of restricting the supply of modern, affordable housing and driving up real estate costs for residents. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.*

*An intermediate solution often proposed is permitting the conversion of historic facades while allowing modern construction behind them. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.*

**Question 4 — [Section A / Reading Comprehension]**

According to the passage, which of the following best represents the primary benefit claimed by the proponents of giving historic preservation laws veto power over urban housing developments?

- A: It has been universally endorsed by all legal and ethical scholars in Culture and Urbanism.
- B: It would completely eliminate the need for any government oversight in Culture and Urbanism.
- C: once a historic building is demolished, a piece of communal memory and architectural history is lost forever
- D: It will guarantee immediate financial profits for all stakeholders involved.

**Question 5 — [Section A / Reading Comprehension]**

Which of the following assumptions is necessary for the proponents' argument regarding giving historic preservation laws veto power over urban housing developments to stand?

- A: That public opinion is always unified on matters of Culture and Urbanism.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: affordable housing demands cannot be met by building on non-historic outer city sites (greenfield land)

**Question 6 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of giving historic preservation laws veto power over urban housing developments?

- A: Preservation policies reflect a prioritisation of collective memory over immediate economic utility.
- B: Historic buildings are structurally safer than modern steel skyscrapers.
- C: No private developer has ever agreed to restore a listed landmark.
- D: Building housing always results in a net decrease in local economic activity.

**Reading Passage:**

*The ongoing debate surrounding implementing a state-funded Universal Basic Income (UBI) has emerged as a central theme in modern Socio-Economics. Proponents argue that its adoption represents a significant milestone, promising the eradication of extreme poverty and providing a safety net against automation-induced job loss. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.*

*On the other hand, a substantial body of criticism focuses on the risk of disincentivizing workforce participation and placing an unsustainable fiscal burden on the treasury. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.*

*An intermediate solution often proposed is funding the program through carbon taxes and sovereign wealth fund dividends. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.*

**Question 7 — [Section A / Reading Comprehension]**

According to the passage, which of the following best represents the primary benefit claimed by the proponents of implementing a state-funded Universal Basic Income (UBI)?

- A: It will guarantee immediate financial profits for all stakeholders involved.
- B: It has been universally endorsed by all legal and ethical scholars in Socio-Economics.
- C: giving citizens direct cash transfers restores their bargaining power and individual dignity
- D: It would completely eliminate the need for any government oversight in Socio-Economics.

**Question 8 — [Section A / Reading Comprehension]**

Which of the following assumptions is necessary for the proponents' argument regarding implementing a state-funded Universal Basic Income (UBI) to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That public opinion is always unified on matters of Socio-Economics.
- C: the majority of individuals will continue to engage in productive or creative work even when survival is guaranteed
- D: That traditional methods have never successfully solved any of the problems in this area.

**Question 9 — [Section A / Reading Comprehension]**

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of implementing a state-funded Universal Basic Income (UBI)?

- A:** A UBI shifts the balance of power from employers to workers by providing an exit option.
- B:** Only high-income individuals would benefit from a flat-rate cash transfer.
- C:** Automation has already eliminated 90% of all administrative jobs.
- D:** A UBI would immediately cause hyperinflation, rendering the currency worthless.

# Submit Answers & Check worked Solutions

## ■ Section Complete!

You have completed this practice exam paper. To check your answers and view step-by-step worked explanations:

■ Go to: <https://applaa.com/practice/check?exam=lnat&paper;=6>

Simply bubble in your choices (e.g. A, B, C, D) and get instantly scored! You can then review the explanations or chat with Appy Buddy (AI Socratic tutor) to understand complex concepts.
