Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=68> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

Few issues in contemporary Social Policy elicit as much controversy as the prospect of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers. At the core of the supportive position lies the promise of ensuring all citizens have equal access to essential goods regardless of their market purchasing power. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of creating inefficient state monopolies and restricting individual consumer choice and flexibility. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably contracting service provision to private entities under strict, publicly managed quality caps. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A:** direct services protect vulnerable individuals from market exploitation and ensure money is spent on essential needs
- B:** It will guarantee immediate financial profits for all stakeholders involved.
- C:** It has been universally endorsed by all legal and ethical scholars in Social Policy.
- D:** It would completely eliminate the need for any government oversight in Social Policy.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers to stand?

- A:** That the financial cost of implementing the technology is completely negligible.
- B:** That traditional methods have never successfully solved any of the problems in this area.
- C:** That public opinion is always unified on matters of Social Policy.
- D:** the state can manage and deliver complex services more cost-effectively than private market competition

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of providing free Universal Basic Services (healthcare, transport, housing) instead of cash welfare transfers?

- A: High-income earners are legally excluded from using public healthcare systems.
- B: The dispute highlights a tension between state-managed welfare equity and individual consumer autonomy.
- C: Free public transport has never been attempted in any European city.
- D: Cash transfers are administratively more expensive than building public hospitals.

Reading Passage:

Few issues in contemporary Economics and Law elicit as much controversy as the prospect of imposing strict state regulations on decentralized cryptocurrencies. At the core of the supportive position lies the promise of protecting consumers from market volatility and preventing money laundering and illicit financing. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of stifling technological innovation and undermining the individual sovereignty of decentralized networks. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably requiring cryptocurrency exchanges to enforce standard identity verification while leaving protocol layers unregulated. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of imposing strict state regulations on decentralized cryptocurrencies?

- A: It would completely eliminate the need for any government oversight in Economics and Law.
- B: without regulatory oversight, retail investors are vulnerable to systemic fraud and market manipulation
- C: It will guarantee immediate financial profits for all stakeholders involved.
- D: It has been universally endorsed by all legal and ethical scholars in Economics and Law.

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding imposing strict state regulations on decentralized cryptocurrencies to stand?

- A: That public opinion is always unified on matters of Economics and Law.
- B: national governments possess the technical enforcement capability to regulate peer-to-peer digital networks
- C: That the financial cost of implementing the technology is completely negligible.
- D: That traditional methods have never successfully solved any of the problems in this area.

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of imposing strict state regulations on decentralized cryptocurrencies?

- A: Most cryptocurrency users are using digital assets to buy physical real estate.
- B: All transactions on public blockchains are completely invisible and untraceable.
- C: Paper fiat currency is completely immune to inflation and currency manipulation.
- D: Cryptocurrencies represent an ideological challenge to the state's monopoly on monetary issuance.

Reading Passage:

Few issues in contemporary Culture and Urbanism elicit as much controversy as the prospect of giving historic preservation laws veto power over urban housing developments. At the core of the supportive position lies the promise of preserving cultural heritage and maintaining the unique aesthetic identity of historic cities. Advocates argue that failing to embrace this development constitutes a form of societal stagnation, keeping obsolete frameworks in place.

On the other hand, a substantial body of criticism focuses on the risk of restricting the supply of modern, affordable housing and driving up real estate costs for residents. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably permitting the conversion of historic facades while allowing modern construction behind them. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of giving historic preservation laws veto power over urban housing developments?

- A: once a historic building is demolished, a piece of communal memory and architectural history is lost forever
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Culture and Urbanism.
- D: It has been universally endorsed by all legal and ethical scholars in Culture and Urbanism.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding giving historic preservation laws veto power over urban housing developments to stand?

- A: That traditional methods have never successfully solved any of the problems in this area.
- B: That the financial cost of implementing the technology is completely negligible.
- C: That public opinion is always unified on matters of Culture and Urbanism.
- D: affordable housing demands cannot be met by building on non-historic outer city sites (greenfield land)

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of giving historic preservation laws veto power over urban housing developments?

- A:** Preservation policies reflect a prioritisation of collective memory over immediate economic utility.
- B:** Historic buildings are structurally safer than modern steel skyscrapers.
- C:** Building housing always results in a net decrease in local economic activity.
- D:** No private developer has ever agreed to restore a listed landmark.
