Instructions & Study Method

Welcome to your Applaa offline practice booklet. Please follow these guidelines to maximize your learning outcome:

- 1. Distraction-Free Practice:** Solve the multiple-choice questions in Section 1 under timed conditions. Do not look for shortcuts or answers until you are completely done.
- 2. Check & Submit Online:** We have intentionally excluded the answer key from this printout. To get your score, see worked solutions, and track your progress metrics, open: <https://applaa.com/practice/check?exam=lnat&paper;=69> on any browser. Bubble in your answers in our digital check sheet.
- 3. Learn with Appy Buddy (AI Socratic Tutor):** Applaa is a 100% ad-free educational space. Our online AI Tutor guides you step-by-step through questions you get wrong, showing you how to solve them rather than just giving you the answer.

■ SUPERCHARGE YOUR STUDIES WITH APPLAA DESKTOP APP

Tired of printing PDFs and manual grading? Download the **Applaa Desktop Application**. It includes interactive exam mocks, real-time pacing stats, auto-grading, and personalized Socratic AI support. Get a **14-day free trial** of our premium preparation package to track your progress rate.

Section 1: Practice Questions

Reading Passage:

The ongoing debate surrounding state funding for crewed space exploration programs has emerged as a central theme in modern Science and Society. Proponents argue that its adoption represents a significant milestone, promising stimulating technological innovation and securing the long-term survival of the human species. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding diverting critical capital from urgent domestic crises like poverty, education, and healthcare. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

To address these conflicts, legal and social scholars have suggested a variety of regulatory remedies, most notably incentivizing public-private partnerships where private companies bear the primary exploration costs. While this compromise holds promise, it faces challenges from both sides. Proponents fear it will dilute the effectiveness of the system, whereas critics worry it will fail to provide sufficient protections, leaving the core issues unresolved.

Question 1 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of state funding for crewed space exploration programs?

- A:** It would completely eliminate the need for any government oversight in Science and Society.
- B:** the technological spinoffs of space travel have historically revolutionized medicine, computing, and communications
- C:** It will guarantee immediate financial profits for all stakeholders involved.
- D:** It has been universally endorsed by all legal and ethical scholars in Science and Society.

Question 2 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding state funding for crewed space exploration programs to stand?

- A:** scientific breakthroughs achieved in space exploration cannot be replicated through direct terrestrial research
- B:** That public opinion is always unified on matters of Science and Society.
- C:** That the financial cost of implementing the technology is completely negligible.
- D:** That traditional methods have never successfully solved any of the problems in this area.

Question 3 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of state funding for crewed space exploration programs?

- A: Public space programs cost more than 50% of the national budget.
- B: The debate reflects a clash between immediate humanitarian duties and long-term scientific aspiration.
- C: We have already established self-sustaining colonies on Mars.
- D: Private aerospace companies are legally prohibited from launching commercial satellites.

Reading Passage:

The ongoing debate surrounding deploying live facial recognition in public street cameras has emerged as a central theme in modern Civil Liberties. Proponents argue that its adoption represents a significant milestone, promising the rapid identification of wanted criminals and preventing public security threats. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

On the other hand, a substantial body of criticism focuses on the risk of eroding the right to privacy, chilling public assembly, and creating a state of perpetual surveillance. Skeptics point out that the implementation of such systems often leads to unintended consequences. They caution that the desire for progress must not overshadow the ethical hazards inherent in this transition.

An intermediate solution often proposed is requiring judicial warrants before cross-referencing surveillance feeds against database watchlists. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 4 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of deploying live facial recognition in public street cameras?

- A: It has been universally endorsed by all legal and ethical scholars in Civil Liberties.
- B: It will guarantee immediate financial profits for all stakeholders involved.
- C: It would completely eliminate the need for any government oversight in Civil Liberties.
- D: Law-abiding citizens have no reason to fear public surveillance if it significantly reduces violent crime rates

Question 5 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding deploying live facial recognition in public street cameras to stand?

- A: That the financial cost of implementing the technology is completely negligible.
- B: That traditional methods have never successfully solved any of the problems in this area.
- C: That public opinion is always unified on matters of Civil Liberties.
- D: Surveillance systems are highly accurate and free from false-positive demographic biases

Question 6 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of deploying live facial recognition in public street cameras?

- A: Facial recognition is only capable of identifying people wearing masks.
- B: Mass surveillance represents a fundamental shift in the presumption of innocence in public spaces.
- C: Camera footage is automatically deleted after 24 hours in all jurisdictions.
- D: Private security guards have the same legal arrest powers as police officers.

Reading Passage:

The ongoing debate surrounding giving historic preservation laws veto power over urban housing developments has emerged as a central theme in modern Culture and Urbanism. Proponents argue that its adoption represents a significant milestone, promising preserving cultural heritage and maintaining the unique aesthetic identity of historic cities. By streamlining operations and introducing systemic standardization, it could pave the way for long-overdue reforms.

However, this enthusiasm is tempered by warnings from critics who raise concerns regarding restricting the supply of modern, affordable housing and driving up real estate costs for residents. In their view, the unchecked expansion of this practice presents a threat to fundamental societal values. The primary danger, they suggest, lies in the potential to overlook individual nuances in favor of systemic efficiency.

An intermediate solution often proposed is permitting the conversion of historic facades while allowing modern construction behind them. In theory, this approach aims to strike a balance between efficiency and protection. However, in practice, implementing such regulations is fraught with difficulty, as it requires balancing contradictory objectives that may be fundamentally irreconcilable.

Question 7 — [Section A / Reading Comprehension]

According to the passage, which of the following best represents the primary benefit claimed by the proponents of giving historic preservation laws veto power over urban housing developments?

- A: once a historic building is demolished, a piece of communal memory and architectural history is lost forever
- B: It would completely eliminate the need for any government oversight in Culture and Urbanism.
- C: It will guarantee immediate financial profits for all stakeholders involved.
- D: It has been universally endorsed by all legal and ethical scholars in Culture and Urbanism.

Question 8 — [Section A / Reading Comprehension]

Which of the following assumptions is necessary for the proponents' argument regarding giving historic preservation laws veto power over urban housing developments to stand?

- A: affordable housing demands cannot be met by building on non-historic outer city sites (greenfield land)
- B: That the financial cost of implementing the technology is completely negligible.
- C: That traditional methods have never successfully solved any of the problems in this area.
- D: That public opinion is always unified on matters of Culture and Urbanism.

Question 9 — [Section A / Reading Comprehension]

Based on the second paragraph, what inference can be drawn regarding the critics' view on the risks of giving historic preservation laws veto power over urban housing developments?

- A:** No private developer has ever agreed to restore a listed landmark.
- B:** Preservation policies reflect a prioritisation of collective memory over immediate economic utility.
- C:** Historic buildings are structurally safer than modern steel skyscrapers.
- D:** Building housing always results in a net decrease in local economic activity.
