Section 1: Practice Questions

Question 1 — [Verbal Reasoning / true_false_cant_tell]

Read the passage below and decide if the following statement is True, False, or Can't Tell based on the text.

Passage: Public health campaigns in South Korea during the late twentieth century made significant progress in combating infectious diseases. In 1994, the incidence rate of Yellow Fever was recorded at 174 cases per 100,000 people. Following a nationwide distribution of protective nets and sanitation improvements, the rate fell to 88 cases per 100,000 people over the next decade. While this decline was celebrated as a major victory, health officials warned that rising temperatures could allow vector populations to rebound in rural regions.

Statement: The incidence rate of Yellow Fever per 100,000 people in South Korea decreased after the public health campaign.

- A: True
- B: False
- C: Can't Tell

Question 2 — [Verbal Reasoning / true_false_cant_tell]

Read the passage below and decide if the following statement is True, False, or Can't Tell based on the text.

Passage: During the mid-nineteenth and early twentieth centuries, global trade networks reshaped national economies. In 1907, the annual production of coffee in Thailand stood at approximately 20 million metric tons. Following key infrastructure improvements and trade agreements with Greece, production in Thailand surged to 61 million metric tons by 1937. During this same period, Malaysia emerged as the primary global importer of coffee, consuming over sixty percent of the total global export supply, although its domestic production remained minimal. Statement: The annual production of coffee in Thailand was higher in 1937 than it was in 1907.

- A: True
- B: False
- C: Can't Tell

Question 3 — [Verbal Reasoning / true_false_cant_tell]

Read the passage below and decide if the following statement is True, False, or Can't Tell based on the text.

Passage: Public health campaigns in Turkey during the late twentieth century made significant progress in combating infectious diseases. In 1971, the incidence rate of Yellow Fever was recorded at 300 cases per 100,000 people. Following a nationwide distribution of protective nets and sanitation improvements, the rate fell to 202 cases per 100,000 people over the next decade. While this decline was celebrated as a major victory, health officials warned that rising temperatures could allow vector populations to rebound in rural regions.

Statement: The nationwide distribution of protective nets cost the government of Turkey over ten million dollars.

- A: True
- B: False
- C: Can't Tell

Question 4 — [Verbal Reasoning / true_false_cant_tell]

Read the passage below and decide if the following statement is True, False, or Can't Tell based on the text.

Passage: Public health campaigns in Saudi Arabia during the late twentieth century made significant progress in combating infectious diseases. In 2004, the incidence rate of Yellow Fever was recorded at 176 cases per 100,000 people. Following a nationwide distribution of protective nets and sanitation improvements, the rate fell to 120 cases per 100,000 people over the next decade. While this decline was celebrated as a major victory, health officials warned that rising temperatures could allow vector populations to rebound in rural regions.

Statement: The nationwide distribution of protective nets cost the government of Saudi Arabia over ten million dollars.

- A: True
- B: False
- C: Can't Tell
