Read the passage below and decide if the following statement is True, False, or Can't Tell based on the text.

Passage: In 2017, research conducted by researchers led by Prof. Alan Turing at the Renewable Energy Research investigated the properties of Perovskite. Initial experimental setups achieved an energy conversion efficiency of 27 percent. By refining the chemical vapor deposition process and reducing crystalline defects, the team successfully boosted the efficiency of Perovskite to 43 percent in follow-up trials. Despite these promising results, commercial viability is currently limited by the high cost of raw precursor materials and safety regulations governing nanotechnology manufacturing. Statement: The research team led by Prof. Alan Turing managed to increase the energy conversion efficiency of Perovskite.

- A: True
- B: False
- C: Can't Tell

Question 2 — [Verbal Reasoning / true_false_cant_tell]

Read the passage below and decide if the following statement is True, False, or Can't Tell based on the text.

In 1995, the incidence rate of Malaria was recorded at 263 cases per 100,000 people. Following a nationwide distribution of protective nets and sanitation improvements, the rate fell to 212 cases per 100,000 people over the next decade. Following key infrastructure improvements and trade agreements with United Kingdom, production in Ukraine surged to 39 million metric tons by 1935. During this same period, New Zealand emerged as the primary global importer of iron ore, consuming over sixty percent of the total global export supply, although its domestic production remained minimal.
